

File Handling

open

mode of operations

```
mode = 'r' -> read
mode = 'w' -> write
mode = 'a' -> append
```

```
In [15]: with open('./dataset/filte.txt',mode='r') as f:
          text =f.readlines()
          f.close()
```

```
In [16]: text
```

```
Out[16]: ["Python can be easy to pick up whether you're a first time programmer or you'r
e experienced with other languages. The following pages are a useful first step
to get on your way writing programs with Python!\n",
'\n',
"Beginner's Guide, Programmers\n",
"Beginner's Guide, Non-Programmers\n",
"Beginner's Guide, Download & Installation\n",
'Code sample and snippets for Beginners']
```

```
In [17]: # write file
          with open('srikanth.txt',mode='w') as f:
              text = 'Innomatics Technology Hub'
              f.write(text+'\n')
              f.close()
```

write a program to create a comma separated values (csv) file which is in below form

Name	Age	Designation
Srikanth	27	DS
RaghuRam	25	DSC
Ramya	26	JDS

using append

```
In [11]: import os
```

```
In [21]: col = 'Name, Age, Designation'
emp1 = 'Srikanth, 25, DSC'
emp2 = 'Ramya, 26, JDS'
employee = [col, emp1, emp2]
directory = './data/'
name = 'emp.csv'

for row in employee:
    files = os.listdir(directory)
    if name in files:
        with open(directory+name, 'a') as f:
            f.write(row+'\n')
            f.close()
    else:
        with open(directory+name, 'w') as f:
            f.write(row+'\n')
            f.close()
```
